

Assignment 1: Introduction to Data Exploration

Luca Gherardi

OVERVIEW

This exercise accompanies the introductory material in Environmental Data Exploration.

Directions

1. Rename this file `<FirstLast>_A01_Introduction.Rmd` (replacing `<FirstLast>` with your first and last name).
2. Change “Student Name” on line 3 (above) with your name.
3. Work through the steps, **creating code and output** that fulfill each instruction.
4. Be sure to **answer the questions** in this assignment document.
5. When you have completed the assignment, **Knit** the text and code into a single PDF file.
6. After Knitting, submit the completed exercise (PDF file) to the appropriate assignment section on Canvas.

1) Discussion Questions

Enter answers to the questions just below the `>Answer:` prompt.

1. What are your previous experiences with data analytics, R, and Git? Include both formal and informal training.

Answer: I have used R in one class during my undergraduate studies, but felt like I did not get a great experience, and would therefore consider myself a beginner. As for Git, I have never used it before this class. With overall data analytics, I have a decent amount of experience from independent studies and projects that require me to analyze data for the sake of creating a poster or report.

2. Are there any components of the course about which you feel confident?

Answer: I feel confident about my ability to learn through the hands on approach.

3. Are there any components of the course about which you feel apprehensive?

Answer: I am concerned about the trouble shooting problems for when I am doing assignments independently.

2) GitHub

Go over Tasks 1.1. through 1.6 on Course Setup page. Provide a link below to your forked course repository in GitHub. Make sure you have pulled all recent changes from the course repository and that you have updated your course README file, committed those changes, and pushed them to your GitHub account.
